

evago: Business Model & Revenue Projections (v1.0)

Event Travel & Experience Operating System

Hybrid End-to-End Magnet-to-SaaS Model | 3-Year Financial Plan

1. EXECUTIVE SUMMARY

evago is an **End-to-End Event Travel & Experience Operating System** built on the core insight that event RSVP approval is the highest-intent moment in the travel funnel. evago captures the complete delegate travel lifecycle by unifying conference discovery, side-event aggregation, intelligent multi-modal travel booking, and a unified digital pass into a single seamless experience.

The platform connects directly with event infrastructure (starting with Luma) to automatically surface conferences and side events a user has signed up for, or allows manual discovery via the Luma event calendar. Once events are selected, evago’s optimization engine calculates the best travel options across flights, buses, cars, and ferries — optimized for travel time, comfort, or price — and books the complete journey. A nominal-fee (\$9.99–\$14.99) **evago TravelPass** consolidates all tickets, event badges, and side-event QR codes into a single dynamic QR interface in Apple Wallet, Google Wallet, and PWA.

Key Financial Highlights

Metric	Year 1	Year 2	Year 3
Year 1 Net Revenue	\$328,560	\$1,175,280	\$2,946,800
Year 1 GTV	\$2,856,000	\$11,385,280	\$28,420,000
Year 3 EBITDA	(\$83,040)	+\$345,680	+\$1,272,400
Peak Burn / Seed Need	\$83,040	—	—
Seed Raise Target	\$450,000–\$550,000	—	—

2. BUSINESS MODEL OVERVIEW

The evago Value Proposition

evago solves the fragmented event travel experience by connecting four previously siloed activities:

- Event & Side-Event Discovery:** Direct Luma account integration automatically surfaces conferences and side events the user has RSVP’d to. Manual discovery mode allows browsing the Luma calendar around a selected conference.

2. **Intelligent Multi-Modal Travel Optimisation:** The system calculates optimal travel routes across flights, buses, cars, and ferries based on user preference — minimize travel time, maximize comfort, or minimize price.
3. **One-Tap Booking & Unified Pass:** Complete journey booking with all tickets consolidated into a single evago TravelPass (Apple Wallet / Google Wallet / PWA) with a common QR code.
4. **Chartered & Private Transportation:** Access to organizer-cooperated chartered cars between side events and dedicated private transportation for premium conferences.

Structural Advantages

- **Luma Integration Reduces Friction:** Connecting a Luma account eliminates manual event selection and automatically pulls side-event RSVPs, creating a zero-input itinerary.
- **Three-Axis Optimisation Engine:** Unlike generic travel aggregators, evago optimizes specifically for the event delegate’s priorities — getting there fast, traveling comfortably, or spending less.
- **Nominal-Fee TravelPass (\$9.99–\$14.99):** High adoption (60% of activated delegates) with ~90% net margin due to near-zero marginal COGS.
- **Full Travel & Onward Booking:** Captures the largest line item in delegate budgets — inbound/outbound flights (\$300–\$800) and onward travel — via GDS/OTA integrations.
- **Chartered Car Network:** Eliminates the chaos of moving between side-event venues with organizer-backed or on-demand private car services.

3. TARGET CUSTOMER SEGMENTS & VALUE PROPOSITIONS

TARGET CUSTOMER SEGMENTS			
EVENT DELEGATES	EVENT ORGANISERS	SIDE-EVENT HOSTS	CHARTER/ OPERATORS
• Luma-connected auto-discovery • Manual calendar browse • Travel optimisation • Unified TravelPass	• B2B Ops SaaS • Chartered Car Fleets • Delegate Arrival Data • Private transport mgmt	• Featured Event Listings • Ticketing Commission • Attendee Flow Routing	• Charter car contracts

1. Event Delegates (B2C)

- **Role:** Primary platform users (conference attendees, speakers, VIPs, sponsors).
- **Value Prop:**
 - Connect Luma account for automatic event and side-event discovery, or manually browse the Luma calendar.
 - Choose travel optimisation priority: **Time, Comfort, or Price.**
 - Receive multi-modal options (flight, bus, car, ferry) with transparent trade-offs.
 - One-tap booking for complete inbound, inter-event, and onward travel.
 - Unified evago TravelPass with common QR for all tickets and event access.
 - Access chartered cars or private transport between side events where available.
- **Monetization:** Nominal TravelPass fee (\$9.99–\$14.99), travel booking markups/commissions, side-event ticket fees.

2. Event Organizers (B2B)

- **Role:** Primary paying client for logistics management.
- **Value Prop:** Real-time arrival tracking dashboard, automated speaker/VIP transport dispatch, official chartered car fleets, and private transportation coordination.
- **Monetization:** Recurring per-event B2B SaaS fee (\$1,500–\$3,500) + B2B charter car contract revenue.

3. Side-Event Hosts & Sponsors (B2B / B2B2C)

- **Role:** Organizers of satellite workshops, hacker houses, VIP dinners, and after-parties.
- **Value Prop:** Targeted distribution to verified event delegates, instant RSVP/ticket checkout, integrated chartered car routing between venues.
- **Monetization:** 5–8% ticketing commission on paid side events, sponsored listing fees (\$250–\$500 per event).

4. FIVE CORE REVENUE STREAMS IN DETAIL

4.1 Full Travel & Onward Booking Engine

- **Role:** High-GTV top-of-funnel capture. Covers inbound flights, regional rail/ferry, bus, car hire, and onward travel.
- **Mechanism:** Integrated via GDS/Flight API aggregators (Duffel, Amadeus), regional transit APIs (12Go, Easybook), and car hire platforms.
- **Optimisation:** User selects one of three optimisation axes — **Time** (fastest routes, fewer connections), **Comfort** (premium carriers, direct routes, larger seats), or **Price** (lowest cost, budget carriers, shared transfers).
- **Economics:**
 - Average Full Travel Basket Size: **\$450.00**
 - Net Commission / Take Rate: **5.0%**
 - Net Contribution per Booking: **\$22.50**

4.2 Unified All-in-One Digital TravelPass

- **Role:** High-volume, high-margin consumer core product.
- **Mechanism:** Compiles flight info, main event badge, side-event entry QRs, local transit passes, and chartered car vouchers into a single dynamic Apple Wallet / Google Wallet pass + Web PWA. All accessible via one **common QR code**.
- **Economics:**
 - Nominal Pass Price (GTV): **\$9.99**

- Digital Generation & Infrastructure COGS: **\$0.99** (PassKit/Google API + Cloudflare)
- Net Contribution per Pass: **\$9.00 (90.1% Net Margin)**
- Delegate Adoption Rate: **60%** of activated delegates.

4.3 Side-Event Concierge & Ticketing

- **Role:** Engagement driver & ancillary yield monetization.
- **Mechanism:** Automatic discovery via Luma connection or manual calendar browse. 1-click RSVP for free side events (drives data capture) and paid ticket sales for exclusive side events, dinners, and parties.
- **Economics:**
 - Paid Side-Event Ticket Average: **\$50.00**
 - Platform Commission (6%): **\$3.00** net contribution per ticket sold
 - Sponsored Side-Event Placement Fee: **\$350.00** flat per sponsored event (avg 3 sponsored side events per conference week).

4.4 Charter Cars & Private Transportation

- **Role:** Physical movement optimization & premium margin capture between side-event venues and conferences.
- **Mechanism:**
 - *Organizer-Cooperated Charter Cars:* Event organizer contracts dedicated venue-to-venue car fleets for side-event hops.
 - *Dedicated Private Transportation:* Premium private car service for conferences where organizers or sponsors subsidize VIP/speaker transport.
 - *On-Demand Inter-Event Cars:* Bookable car rides between side events when charter coverage is not available.
- **Economics:**
 - B2B Charter Car Contract (per event): **\$2,500.00** (COGS: \$1,750, Net Margin: **\$750.00**)
 - On-Demand Inter-Event Car (avg 10 trips/event): **\$300.00** (COGS: \$210, Net Margin: **\$90.00**)
 - Dedicated Private Transport (VIP package): **\$1,200.00** (COGS: \$840, Net Margin: **\$360.00**)

4.5 Organiser Operations SaaS

- **Role:** High-margin B2B anchor profit center.
- **Mechanism:** B2B subscription for event organizers to access real-time delegate arrival feeds, speaker logistics dispatch, side-event attendance heatmaps, and chartered car fleet management.
- **Economics:**
 - SaaS Fee per Event (Y1 / Y2 / Y3): **\$1,500 / \$2,250 / \$3,500**
 - Gross Margin: **95–100%**

5. VOLUME & CONVERSION ASSUMPTIONS (YEARS 1–3)

Metric / Driver	Year 1	Year 2	Year 3
Events Activated	12	40	80

Table 2 – continued

Metric / Driver	Year 1	Year 2	Year 3
Avg Attendees per Event	3,000	3,200	3,500
Delegate Platform Activation Rate	20% (600/event)	25% (800/event)	30% (1,050/event)
Luma Account Connection Rate	45%	55%	65%
Manual Calendar Browse Rate	55%	45%	35%
Full Travel Engine Bookings (% of Activated)	25%	30%	35%
Full Travel Avg Basket Size (GTV)	\$450	\$480	\$520
Optimisation Mode: Time	40%	40%	40%
Optimisation Mode: Comfort	25%	25%	25%
Optimisation Mode: Price	35%	35%	35%
Unified TravelPass Attach Rate (% of Activated)	60%	65%	70%
TravelPass Price	\$9.99	\$11.99	\$14.99
Paid Side-Event Tickets Sold / Event	150	300	500
Organiser Charter Car Contracts / Event	1.0	1.5	2.0
On-Demand Inter-Event Cars / Event	10	20	35
Dedicated Private Transport Packages / Event	2	4	6
B2B Organiser SaaS Attach Rate	40%	60%	75%
B2B SaaS Fee per Event	\$1,500	\$2,250	\$3,500

6. FINANCIAL PROJECTIONS (YEARS 1–3)

6.1 Net Revenue Breakdown by Source (Contribution After Direct COGS)

Y1 Net Revenue (\$328.5K)	Y2 Net Revenue (\$1.16M)	Y3 Net Revenue (\$2.95M)
---------------------------	--------------------------	--------------------------

TravelPass: 23.4%	TravelPass: 24.8%	TravelPass: 26.7%
Full Travel: 24.7%	Full Travel: 24.8%	Full Travel: 28.1%
Side Events: 17.5%	Side Events: 18.2%	Side Events: 18.3%
Charter Cars: 28.9%	Charter Cars: 24.4%	Charter Cars: 17.4%
B2B SaaS: 5.5%	B2B SaaS: 7.8%	B2B SaaS: 9.5%

Net Revenue Source (\$ USD)	Year 1 (12 Events)	Year 2 (40 Events)	Year 3 (80 Events)
Full Travel & Onward Engine	\$81,000	\$288,000	\$828,100
Unified Digital TravelPass	\$76,896	\$299,280	\$786,976
Side-Event Ticketing & Sponsorship	\$57,600	\$214,000	\$538,000
Charter Cars & Private Transport	\$95,064	\$284,000	\$513,724
Organiser Ops SaaS	\$18,000	\$90,000	\$280,000
TOTAL NET REVENUE	\$328,560	\$1,175,280	\$2,946,800

6.2 Gross Transaction Value (GTV) — Total Dollar Flow

Source (\$ USD GTV)	Year 1	Year 2	Year 3
Full Travel Engine (Flights, Rail, Bus, Car, Hotels)	\$1,620,000	\$6,912,000	\$19,110,000
Unified Digital TravelPass Fees	\$85,314	\$332,522	\$881,412
Side-Event Ticket Sales	\$90,000	\$600,000	\$2,000,000
Charter Cars & Private Transport	\$1,042,686	\$3,450,758	\$6,148,588
Organiser Ops SaaS Fees	\$18,000	\$90,000	\$280,000
TOTAL GTV	\$2,856,000	\$11,385,280	\$28,420,000
Blended Net Take Rate (Net Rev / GTV)	11.5%	10.3%	10.4%

6.3 P&L Summary & Operating Expenses

Line Item (\$ USD)	Year 1	Year 2	Year 3
Net Revenue	\$328,560	\$1,175,280	\$2,946,800
Engineering & Product Team	(\$216,000)	(\$480,000)	(\$960,000)
BD & Event Operations	(\$96,000)	(\$210,000)	(\$450,000)
Cloud Infrastructure & Pass Generation	(\$3,600)	(\$9,600)	(\$24,400)
Marketing & Community Sponsorships	(\$36,000)	(\$90,000)	(\$180,000)
Legal, Compliance & EMI Licences	(\$60,000)	(\$40,000)	(\$60,000)
Total Operating Expenses (Opex)	(\$411,600)	(\$829,600)	(\$1,674,400)
EBITDA	(\$83,040)	+\$345,680	+\$1,272,400
Cumulative EBITDA	(\$83,040)	+\$262,640	+\$1,535,040

[!NOTE] **Funding Efficiency:** Peak cumulative burn is just **\$83,040** in Year 1 because high TravelPass adoption (60%) and Full Travel commissions generate cash immediately. A **\$450,000–\$550,000 Seed Raise** provides over 24 months of operational runway to comfortably reach cash-flow positivity by Q4 of Year 1.

7. USER JOURNEY & WORKFLOW

EVAGO USER JOURNEY				
STEP 1: EVENT DISCOVERY	STEP 2: SIDE EVENT SELECTION	STEP 3: TRAVEL OPTIMISATION	STEP 4: BOOK & CONFIRM	STEP 5: EVAGO TRAVELPASS
• Connect Luma account OR • Manually pick conference	• Auto-populate from Luma RSVPs • Manual browse Luma calendar around conf	• Select optimi- sation axis: Time / Comfort / Price • Multi-modal options: Flight / Bus / Car / Ferry	• One-tap book all legs • Payment confirmation	• Common QR for all access • Apple/Google Wallet + PWA • Real-time updates

STEP 6: CHARTER & PRIVATE TRANSPORT

- View available chartered cars between side events (organizer-cooperated)
- Book dedicated private transportation for conferences with VIP service
- Access on-demand inter-event car booking when charter coverage unavailable
- All transport vouchers embedded in evago TravelPass common QR

Detailed Flow

1. Step 1 — Event Discovery

- **Luma Connected:** User authenticates with Luma. evago automatically surfaces all conferences the user has RSVP'd to.
- **Manual Mode:** User browses the Luma event calendar, filters by city/date, and manually selects a target conference.

2. Step 2 — Side-Event Selection

- **Luma Connected:** evago automatically pulls all side events the user has signed up for via Luma and displays them in chronological order.
- **Manual Mode:** User browses the Luma calendar around the selected conference date range, views side events (workshops, parties, networking), and manually selects those they plan to attend.
- User can add/remove side events at any time; the itinerary recalculates dynamically.

3. Step 3 — Travel Optimisation & Calculation

- User selects their **optimisation preference**:
 - **Time:** Minimize total journey duration, prioritize direct routes, minimize layovers/connections.
 - **Comfort:** Prioritize premium carriers, larger seats, fewer stops, private transfers over shared.
 - **💰 Price:** Lowest total cost, budget carriers, shared transfers, off-peak departures.
- evago calculates multi-modal travel options across:
 - **Flight** (inbound, regional, onward)
 - **Bus** (intercity, airport transfers)
 - **Car** (private hire, shared rides, car rental)
 - **Ferry** (regional maritime links)
- Each option displays a clear comparison card showing total duration, comfort rating, and total price.

4. Step 4 — Booking & Confirmation

- User selects their preferred travel package and confirms with one-tap checkout.
- evago books all legs sequentially via integrated APIs (GDS for flights, 12Go/Easybook for bus/ferry, car hire platforms for car).
- User receives booking confirmations and e-tickets within the app.

5. Step 5 — evago TravelPass Issuance

- User is offered the evago TravelPass at \$9.99.
- Upon purchase, a unified digital pass is generated and added to **Apple Wallet** and **Google Wallet** (plus PWA fallback).
- The pass contains a **common QR code** that grants access to:
 - Main conference badge

- All side-event entry passes
- Flight boarding passes
- Bus/ferry tickets
- Chartered car and private transport vouchers
- The QR is dynamic — it updates in real-time if delays occur or if the user modifies their itinerary.

6. Step 6 — Charter Cars & Private Transportation

- For conferences with **organizer-cooperated charter car services**, evago displays available routes between the main venue, official hotels, and side-event locations.
- For **premium conferences**, users can book dedicated private transportation (e.g., speaker/VIP car service).
- Where charter coverage is unavailable, users can book **on-demand inter-event cars** directly through evago.
- All car bookings are embedded in the TravelPass common QR for seamless driver validation.

8. GO-TO-MARKET & PARTNERSHIP ECOSYSTEM

Distribution Channels

- **Luma SDK / OAuth Integration:** Primary acquisition channel. Users connect their Luma account at onboarding; evago automatically becomes their event travel companion.
- **Side-Event Hosts Network:** Co-marketing with side-event hosts who embed evago travel & shuttle widgets on their Luma event pages.
- **Direct Organiser Sales Motion:** Offering zero-cost attendee arrival analytics and chartered car coordination to conference organizers in exchange for exclusive placement and charter contracts.

Partnership Architecture

- **Event Discovery:** Luma API (primary), Eventbrite API, Partiful API for event and side-event data.
- **Flight & Hotel GDS:** Duffel API, Amadeus for global flight search and ticketing.
- **Regional Transit Providers:** 12Go, Easybook, Batam Fast Ferry, Sindo Ferry for ASEAN inter-city bus/ferry links.
- **Car & Private Transport:** Uber API, Grab API, local car hire platforms, direct charter operator contracts.
- **Digital Pass Tech:** Apple PassKit, Google Wallet REST API for live QR updating and delay alerts.

9. COMPETITIVE MOAT & RISKS

Defensibility

1. **Luma Integration Lock-In:** Deep OAuth integration with Luma creates a data moat — evago knows what events and side events a user is attending before they even think about travel.
2. **Unified Pass Lock-In:** Delegates rely on the single evago TravelPass with its common QR for their entire event week (flights, main badge, side events, shuttles, charter cars).

3. **Side-Event + Transport Liquidity:** Aggregating both main event and side-event attendance data with inter-event transport creates an irreplaceable event-week mobility network effect.
4. **Three-Axis Optimisation:** The Time/Comfort/Price optimisation engine is tuned specifically for event delegates, not generic travelers.
5. **Organiser Workflow Integration:** Organizers rely on evago for arrival tracking, speaker VIP transit, official charter car fleet management, and side-event attendance heatmaps.

Risks & Guardrails

- **Luma API Dependency:** Mitigated by multi-platform support roadmap (Eventbrite, Partiful, Lu.ma alternatives). Manual calendar browse mode ensures platform independence.
 - **GDS / Flight API Dependency:** Mitigated by multi-supplier fallback (Duffel + Amadeus).
 - **Side-Event Data Accuracy:** Automated Luma API sync + official host submission portals to keep side-event listings up to date.
 - **Pass Compliance & Fraud:** Asymmetric client-side encryption for pass payload signing and anti-replay QR validation.
 - **Charter Car Supply:** Direct operator contracts with 30-day cancellation terms; on-demand car booking as fallback.
-

10. SUMMARY & NEXT STEPS

evago transforms event travel from a fragmented, stressful chore into a single, optimised, unified experience. By connecting Luma for automatic event discovery, calculating multi-modal travel optimised for Time/Comfort/Price, booking the complete journey, and consolidating everything into a common-QR TravelPass — while also providing chartered cars and private transport between side events — evago unlocks **\$28.4M in Year 3 GTV** and **\$2.95M in Net Revenue** with **\$1.27M in EBITDA**.

Immediate Action Plan

1. **Build Luma OAuth Integration:** Implement Luma account connection and automatic event/side-event sync.
2. **Develop Travel Optimisation Engine:** Build the three-axis (Time/Comfort/Price) routing algorithm across flight/bus/car/ferry APIs.
3. **Build TravelPass Prototype:** Extend pass generation to compile multi-ticket wallet passes with a single common QR.
4. **Initiate Charter Car Pilot Sales:** Present evago Cooperated Charter Car & Ops SaaS package to upcoming Q3/Q4 ASEAN tech events.
5. **Manual Calendar Browse Mode:** Implement Luma calendar browsing for users who do not connect their account.
